

LIVE STREAM MONDAY 20TH MAY

Dear Parent or Guardian,

On Monday 20th May as part of Techweek19 your child's class will be participating in a values based game design live stream for 1-2 hrs.

This is presented by award winning charity, OMGTech! - It brings a new way of looking at game design. Where students are the central characters and they can to put themselves, their values, stories, and their imaginations at the centre.

Games are awesome, they are a great way to tell your stories and have a whole heap of fun along the way. They are even better when they have a purpose and are based on strong values or morals.

To join in with the activities we might need help gathering some house hold items. If you can help, please send these items to school by Friday 18th May.

If you want to check it out, we will be livestreaming from 10am -12pm at
OMGTECH.CO.NZ/GAMEDESIGN

Your child will be taking part in one of the following:

- Offline Activity: Make a Board Game - You know me: a Whanaungatanga Game**
- What you will need: Need a collection of objects you can use in a game ie Cardboard; paper; dice; felts; timers; game pieces**
- Online Activity: Make an online game with Construct 3 - "Pick up your rubbish!!!" An introduction to value based game design in C3**
- What you will need: Access to the internet and a computer .**

We would also love it if you could fill in the attached values sheet with your child in advance ready for Mondays session.

Thanks for your support!
